A word of advice regarding property:

To help be certain that the title is clear and protected from most attacks or claims arising out of the past . . . . have the title insured by CHICAGO TITLE INSURANCE COMPANY. It is the company with nation-wide operating experience . . . . plus offices and agents throughout the country with local staffs who are completely familiar with local real estate practices.

A MESSAGE FROM OUR COMPANY

This book is published as a reference guide to county farmland ownership. The men and women of our company, both in the advertising sales department and the map and directory branch, have spent months in your county soliciting advertisements, preparing up-to-date maps and compiling and arranging the directory information. All the enclosed data was compiled from the Official Public Records at your County Court House and elsewhere. Due to the continual sales and transfers of property, it is almost impossible to guarantee 100% accuracy. However, painstaking effort has been made to make this new Plat Book and Index of Owners the finest yet produced in your county. We do not accept any responsibility for omissions or errors. If you notice any omissions or errors in this, your County Plat Book and Index of Owners, please let our office know so that we may correct our records.

We wish to acknowledge the wholehearted, sincere assistance received from your County Officials and the excellent participation of the businessmen throughout the county. It was their cooperation and support that has made your County Plat Book and Index of Owners possible.

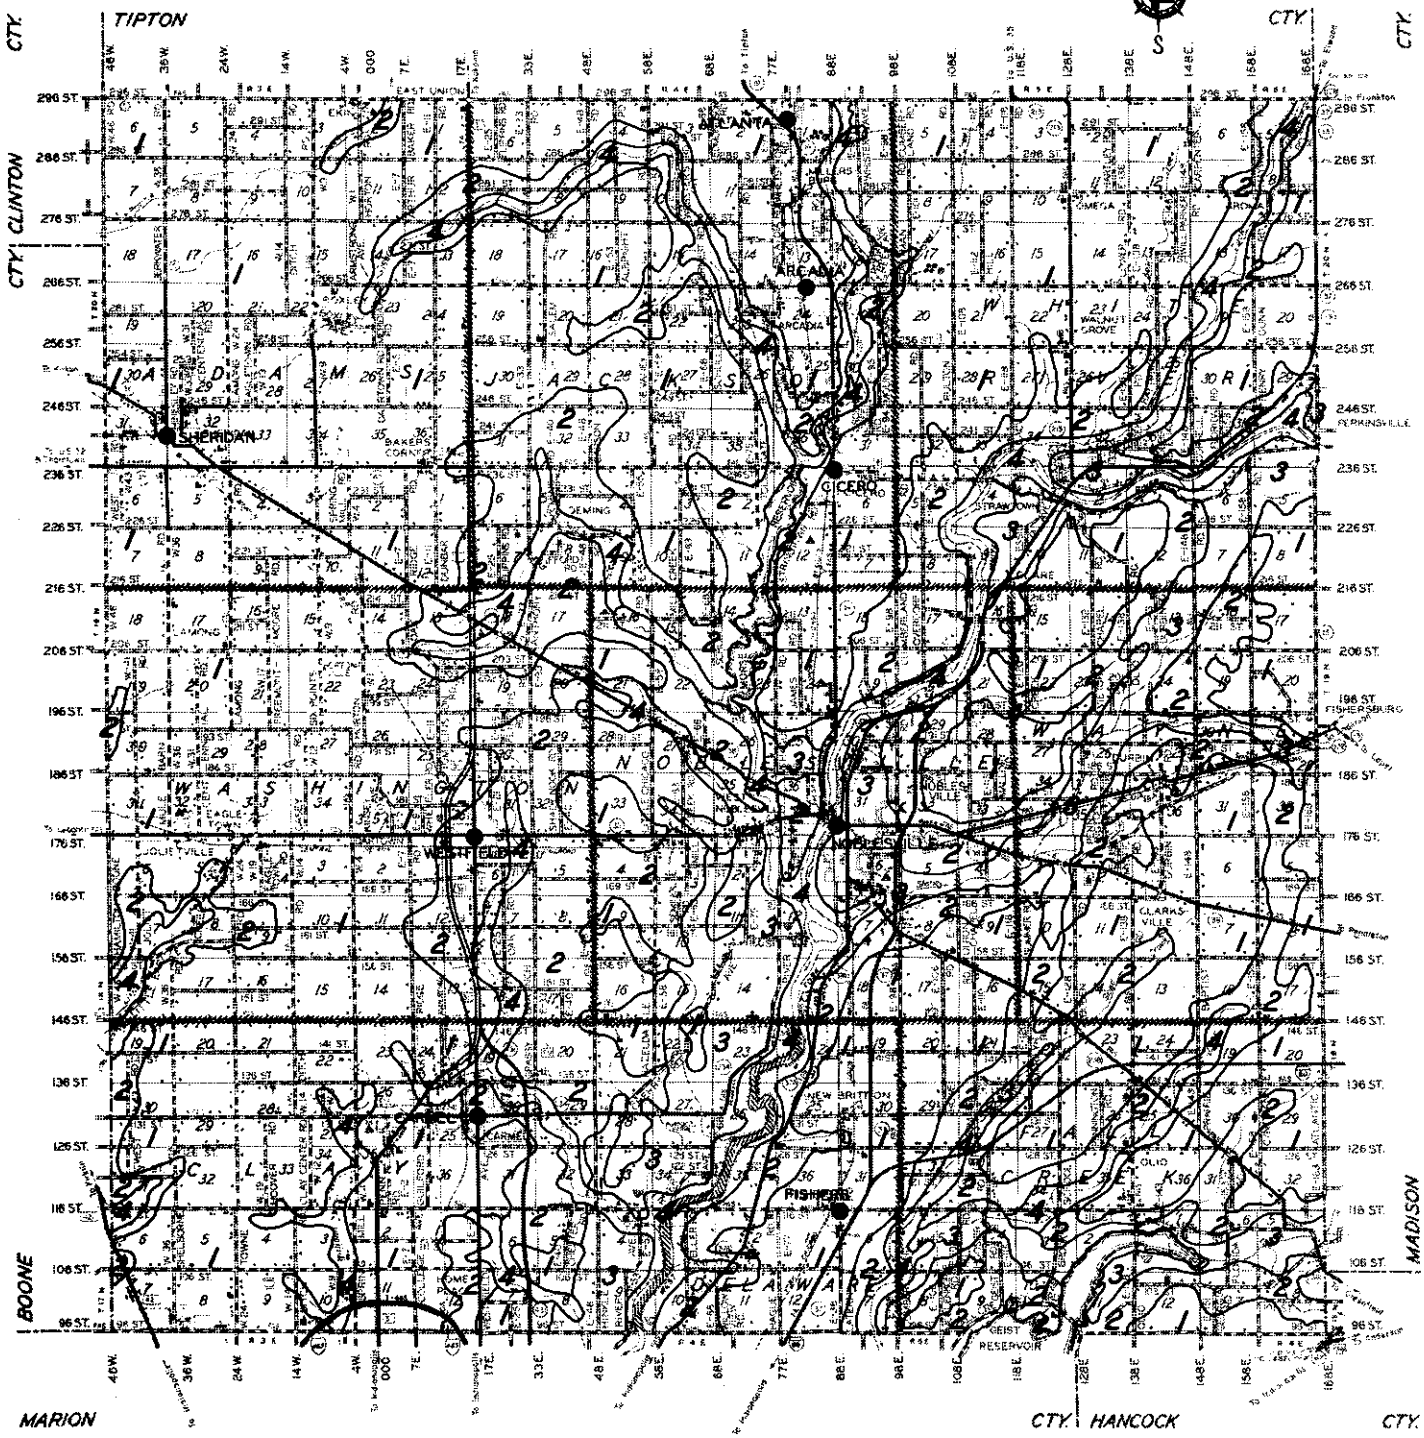
COUNTY SOIL MAP



NOTE: This map is intended for general planning. Each delineation contains soils different from those shown in the legend. For operational planning, use detailed soils maps that are available in published or unpublished form at the local Soil and Water Conservation District Office.

1. CROSBY-BROOKSTON: These soils are on uplands and underlain by dense glacial deposits. The nearly level, gray colored Crosby soils are somewhat poorly drained. The depressional black Brookston soils are very poorly drained.

2. MIAMI-CROSBY: These soils are on uplands and are underlain by dense glacial deposits. The nearly level to strongly sloping brown Miami soils are well drained. The nearly level gray colored Crosby soils are somewhat poorly drained.

3. OCKLEY-WESTLAND-FOX: These soils are on terraces and are underlain by sand and gravel. The nearly level to moderately sloping, light brown Ockley and Fox soils are well drained. The depressional black Westland soils are very poorly drained.

4. GENESEE-SHOALS: These soils are on the bottomlands near streams and are underlain by sand and gravel. These soils are subject to flooding. The nearly level brown Genesee soils are well drained. Shoals soils are somewhat poorly drained.
