RE: George Symonds Drain Two-Stage Ditch Reconstruction

Attached are the plans, schedule of assessments and drainage shed map, for the George Symonds Drain Two-Stage Ditch Reconstruction Project.

The George Symonds Drain is located in Adams Township of Hamilton County and benefits properties in Sections 22, 23, 27, 28, 32, and 33 of Township 20 North, Range 3 East.

The following regulated drains presently drain to the George Symonds Drain: Herr Haughey, Abe Laudig, Ida Teter, William Thomas, George Beam, Benton Hinesley, and the William Krause.

The William Thomas, George Beam, George Symonds Arm 3, William Krause, and the Benton Hinesley Drains drain into the segment of the ditch being reconstructed.

The attached plans, dated August 19, 2015, were prepared by Banning Engineering, Inc. The plans are for the construction of a two-stage ditch along a portion of the Drain.

I have made a personal inspection of the Drain. Upon doing so, I believe that the drain is practicable; will improve the public health; will be of public utility; and that the costs, damages and expenses of the proposed drain will probably be less than the benefits accruing to the owners of land likely to be benefited.

History

The drain now known as the George Symonds Drain was originally petitioned by Joseph Furnas and established as the West Cicero Ditch in 1877 through the Commissioner's Court. This drain began at the section line between Sections 28 and 29, Township 20 North, Range 3 East and ran to a point 20 rods North of the South line of the Northwest $\frac{1}{4}$ of Section 23, Township 20 North, Range 3 East at an old mill dam.

In 1892 George Symonds petitioned the Circuit Court for the drain as it now exists. (See Commissioners Record Pages 155-175). This drain consisted of a main drain and six (6) arms. Many of the arms became other regulated drains through the years, such as the Benton-Hinesley Drain, William Krause Drain, and the George Beam Drain. The portion of the drain between Station 0+00 and Station

22+15 was tiled as part of the William Krause Drain in 1919. The remaining drain is 16,985-feet in length between Station 22+15 and Station 192+00.

The drain has been assessed for repairs by the County in 1926, 1932, 1934, 1936, 1938 and 1941. The last maintenance performed by the County was in 1965 and was done to remove debris and blockage in the ditch caused by the 1965 Palm Sunday tornado.

The Drain was placed on maintenance at hearing during the July 24, 1995 meeting of the Hamilton County Drainage Board. At this meeting, the Extension Arm to the George Symonds Drain was approved. This extension added 4,600-feet to the Drain between Station 192+00 and Station 238+00. (See Drainage Board Minutes Book No.4, pages 129-132).

Several filter strips were installed along the drain under maintenance in 2000 as part of Work Order WO-2000-00010. The south and east sides of the ditch between the western line of Parcel 01-01-32-00-00-016.00 and 246th Street; a length of 2,355-feet. The east and south side of the ditch between 246th Street and Eagletown Road, a length of 3,380-feet. The north and west side of the ditch from Eagletown Road to the north line of Parcel 01-01-28-00-01-001.000; a length of 1,656-feet. The south and east side of the ditch from the George Beam Drain (approximately) to the east line of Parcel 01-01-28-00-00-007.000 (also the east line of Section 28 Township 20 North Range 3 East); a length of 2,730-feet. The cost of this work order was \$34,742.12.

At the July 26, 2010 meeting of the Drainage Board, the R&S Corporation Extension Arm to the George Symonds Drain was established at hearing and the length of the Drain extended. The Arm is 750-feet in length between Station 238+00 and Station 245+50. (See Drainage Board Minutes Book 13, pages 69-70)

During the July 7, 2011 meeting of the Drainage Board, flooding of the Moore (Parcel 01-01-28-00-00-013.001) and Koepkey (Parcel 01-01-28-00-00-009.103) properties were discussed. A study of the Symonds and Krause watersheds was recommended. (See Drainage Board Minutes Book No. 13, pages 468-473).

At the November 28, 2011 meeting of the Drainage Board, Banning Engineering was contracted to perform a hydraulic study of the Symonds and Krause watersheds. The contract was in the amount of \$79,700.00 (See Drainage Board Minutes Book 14, page 45). As the proposed hydraulic study included both the William Krause and George Symonds watersheds, the effort associated with the study of each watershed was documented separately. The costs associated with the hydraulic study for the George Symonds shed are listed in the Total Project Costs section of this report based on submitted invoices.

At the August 27, 2012 meeting of the Drainage Board, buying the Moore and Koepkey properties was discussed. (See Drainage Board Minutes Book No.14, pages 233-234).

Banning Engineering presented the findings of the Symonds and Krause Watershed Study during the October 8, 2012 meeting of the Drainage Board. (See Drainage Board Minutes Book No.14, pages 326-332). The projects recommended by the Study were identified as Projects 1, 2, 6, 7, and 9. These projects are briefly described in the Reconstruction Project section of this report.

Further discussion concerning the various options of the Symonds and Krause Watershed Study took place during the November 13, 2012 meeting of the Drainage Board. (See Drainage Board Minutes Book No.14, pages 375-378).

The record includes the minutes of a joint meeting of the Hamilton County Drainage Board and the Sheridan Town Council that took place at the Sheridan Town Hall on July 30, 2013. The minutes

indicate that “A discussion of the George Symonds and William Krause Drainage Improvements was held.” (See Drainage Board Minutes Book No.15, page 107 and page 113).

The Drainage Board approved obtaining appraisals of the Moore and Swan (Parcel 01-01-28-00-00-009.004) properties at the August 26, 2013 meeting of the Drainage Board. (See Drainage Board Minutes Book No.15, page 146). The purchase of these properties was recommended as part of Project 10 outlined in the Study.

At the September 9, 2013 meeting of the Drainage Board, purchasing the Moore and Swan properties was approved. The value of the Swan property was reported to be \$29,325.00. The value of the Moore property was not listed but was to be purchased through a Hazard Mitigation Grant. (See Drainage Board Minutes Book No.15, page 153).

At the November 12, 2013 meeting, it was reported that the deed for the Swan property had been received. (See Drainage Board Minutes Book No.15, page 234).

At the January 27, 2014 meeting of the Drainage Board, it was reported that the application for the Hazard Mitigation Grant for the purchase of the Moore property was not successful. (See Drainage Board Minutes Book No.15, page 338)

During the April 14, 2014 meeting of the Drainage Board, Banning Engineering was contracted to design the two-stage ditch. The contract, Task Order No.3, was a not-to-exceed contract in the amount of \$45,000.00 for engineering and \$5,000.00 for Rule 5 applications per soil disposal sites (up to six sites). (See Drainage Board Minutes Book No.15, pages 383-384)

The acceptance of the counteroffer to purchase the Moore property was approved during the June 9, 2014 meeting of the Drainage Board. The counteroffer was in the amount of \$128,179.57. (See Drainage Board Minutes Book No.15, page 443)

During the January 12, 2015 meeting of the Drainage Board, the Board approved an extension of services under Task Order No.3 with Banning Engineering in the amount of \$6,170.00 for soils analysis associated with the design of the two-stage ditch project. (See Drainage Board Minutes Book No.16, page 79)

During the August 24, 2020 meeting of the Drainage Board, an amendment to Task Order No. 3 with Banning Engineering was approved. The amendment reduced the contract amount from \$45,000 to \$40,223.75 (a reduction of \$4,776.25). This amendment released Banning from any further obligations associated with this contract. (See Drainage Board Minutes Book No.19, page 308).

Work Order History

The following is the work order history for the Drain since 2001. There have been 37 work orders totaling \$138,727.11.

Job#	Date Completed	Description	Location	Cost
WO-2000-00109	8/14/2001	Removed fallen tree from drain	East of Eagletown Rd & North of 246th St	\$429.00

Existing Conditions

The George Symonds and William Krause Watershed Study by Banning Engineering completed in 2013 (Study) indicated that there is flooding throughout the watershed, but the flooding is most severe at six locations. The six locations included the Moore property (Area 4) and the Koepkey Property and Fox Field Estates (Area 5). The Study also indicated that Lamong Road has a 50% chance of overtopping annually (2-year) and that Eagletown Road has between a 4% (25-year) and 10% (10-year) chance of overtopping annually. The intersection of 246th Street and Eagletown Road has a history of flooding.

The following is a list of Drainage Complaints filed with the Surveyor's Office since 2000. There has been a total of 26 drainage complaints filed.

Reconstruction Project

The two-stage ditch is one of the projects recommended in the Study. Of the 10 projects identified in the Study, the following projects were recommended:

- Project 1 – Krause Drain Reconstruction within Sheridan, Open Ditch and detention facility.
- Project 2 – Two stage ditch on George Symonds Drain.
- Project 6 – Benton Hinesley Grass Waterway
- Project 7 – Swan property and Eagletown Road flow improvements
- Project 9 – Reconstruction of George Symonds Drain, Arm 3

As of the date of this report, Projects 1 (known as the William Krause Phase 1, Phase 2, and Phase 3 projects), 6 and 9 are either finished, under or nearing completion.

Additional projects identified in the Study have also been completed. Project 8 recommended relocating the residential structure on the Moore property out of the limits of the future floodplain. The property was purchased, and the residential structure was removed. Project 10 recommended the purchase of the Moore, American Legion Post 67, Koepkey, and Swan properties. The Moore and Swan properties were purchased.

The reconstruction project is identified as Project 2 in the Study. The project includes the construction of a two-stage ditch along a segment of the existing open ditch. The length of the project from the construction plans is 6,965-feet. The two-stage ditch will begin several feet above the current ditch bottom and extend horizontally 8-feet or 14-16 feet then continue up to existing grade at a 3:1 slope. The two-stage channel is mainly on one side of the ditch but includes an area (a length of approximately 609-feet) where the two-stage channel will be on both side of the open ditch. Roughly 120 square feet of additional cross-sectional ditch flow area will be added with this project.

The reconstruction project will benefit Areas 4 and 5 (identified in the Study) by lowering the BFE by 0.3 feet throughout the area of construction. The project will also enhance stormwater quality by resulting in lower velocities during the more frequent, lower flow storm events. Lower velocities result in suspended solids to fall out of suspension and lessen the likelihood of ditch bank sloughing. Additionally, the project will increase the ditch capacity from a 50% risk of exceedance (2-year capacity) to approximately a 20% risk of exceedance (5-year capacity). In tandem with Project 7, this project will alleviate issues of flooding of the intersection of 246th Street and Eagletown Road.

The portion of the Drain that will be improved by this Reconstruction Project starts, approximately, at the South Line of Section 28, Township 20 North Range 3 East (246th Street) and ends,

approximately, at the East Line of Section 28, Township 20 North Range 3 East (approximately 1/2-mile west of Six Points Road).

The portions of the Drain outside of Section 28 of Township 20 North Range 3 East will not be affected by this project.

The two-stage ditch will be constructed across the following parcels and on the side of the Drain noted.

Parcel No.	Owner	Side of Ditch (Looking Downstream)
01-01-28-00-00-013.000	Merrill, Gary & Cheryl R	Right
01-01-28-00-00-016.000	Osborne, Kelvin J	Right
01-01-28-00-00-014.000	Merrill, Gary & Cheryl R	Right
01-01-28-00-00-012.000	Garcia, Joe B & Griselda M	Right
01-01-28-00-00-011.000	Roudebush, Jeffory L	Right
01-01-28-00-00-009.004	Hamilton County Board of Commissioners	Left
01-01-28-00-01-003.000	Dixon, Patricia K	Left
01-01-28-00-01-002.000	Zola, David J & Lisa M	Left
01-01-28-00-01-001.000	Gwin, David R	Left
01-01-28-00-00-009.002	Habig, Frank J	Right (A length of approximately 609-feet upstream from a point that is approximately 60-feet upstream of the north parcel line)
01-01-28-00-00-007.000	Majesty Inc	Right

Upon completion of this project, the only remaining project recommended by the Study to be completed is Project 7. Project 7 includes the installation of 6, 48-inch culverts under Eagletown Road and the construction of a lateral detention area on the Swan property. The construction plans for this project are complete and the Swan property has been acquired.

Permits

Per a letter dated May 26, 2015 from the Army Corps of Engineers, the project is not subject to regulation pursuant to Section 404 of the Clean Water Act and a Department of the Army permit is not required.

The total length of the stream is approximately 4-miles and is exempt from the IDNR Construction in a Floodway permit per IC 14-28-1-22(b)(1).

All work is being completed above the ordinary high-water mark of the open ditch and within the existing easement. No other permits are required.

Construction Cost

On September 27, 2021, the Drainage Board received four bids for the reconstruction project. The bid included a Base Bid and one Alternate Bid. The bids received were as follows:

<i>Company</i>	<i>Base Bid</i>	<i>Alternate Bid</i>	<i>Total Base Bid and Alternate Bid</i>
Morphey Construction, Inc.	\$710,000.00	\$205,000.00	\$915,000.00
F&K Construction, Inc.	\$334,610.00	\$519,000.00	\$853,610.00
Hoosier Pride Excavating, Inc.	\$488,752.45	\$350,000.00	\$838,752.45
Monroe, LLC	\$407,000.00	\$537,000.00	\$944,000.00

The lowest bidder was Hoosier Pride Excavating, Inc. Based on the bid received, the cost of construction for this project is outlined below.

<i>Base Bid</i>					
<i>Item</i>	<i>Description</i>	<i>Quantity</i>	<i>Unit</i>	<i>Unit Price</i>	<i>Total Price</i>
BB-1	Clearing	1	LS	\$28,500.00	\$28,500.00

<i>Total Alternate Bid</i>					<i>\$350,000.00</i>

Easements

The work will be completed within the existing regulated drain easement and no additional easement is required for the project.

Filter Strips

20-foot filter strips are hereby established across the following parcels.

Changes to the Drain

There are no changes to the length of the Drain as a result of this project.

Total Project Costs

The total cost of the project includes construction costs, professional service costs, property appraisal costs, and property acquisition costs. The total cost of this project is \$1,283,845.43. The various costs are outlined below:

Item	Cost
Symonds and Krause Watershed Study [Banning Engineering; Invoices for work associated with George Symonds Watershed]	\$53,768.93
Survey, Design, Specifications, Soil Borings and Analysis for Two Stage Ditch Project [Banning Engineering; Task Order No. 3]	\$40,223.75
Soil Borings and Analysis for Two Stage Ditch Project [Banning Engineering; Task order No. 3 Extension]	\$6,170.00
Construction [Base Bid Plus Alternate Bid]	\$838,752.45
15% Construction Contingency	\$125,812.87
Construction Staking, Grade Checks, As-Built Drawings [Banning Engineering; Estimate]	\$56,000.00
Total Project Cost	\$1,120,728.00

Project Funding

A portion of the project may be funded by the Coronavirus State and Federal Fiscal Recovery Funds of the American Rescue Plan. As of the date of this report, the first round of funds from this program is available. The construction estimate submitted for ARP funding by the Surveyor for the reconstruction project was \$979,987.00. Therefore, the amount of the project to be funded from this source is \$979,987.00.

A portion of the project may be funded from the George Symonds Maintenance Fund as allowed by IC-36-9-27-45.5. The maintenance fund balance for the George Symonds Drain is currently \$82,210.37. There is an outstanding Work Order 2021-00207. After payment, the maintenance fund balance will be \$81,020.37. The George Symonds Drain maintenance fund currently receives \$43,506.22 annually from maintenance assessments. 75% of the current fund balance equals \$60,765.28.

The balance of the total project cost that is not payable from the America Rescue Plan or the Drain Maintenance Fund, equal to \$79,975.72, will be funded by assessment of the benefitted shed. The benefitted shed is that portion of the shed upstream of the end of the project. The benefitted drainage shed includes 899-parcels consisting of 2,966.29-acres.

Before the hearing, soft costs were incurred in the amount of \$100,162.68 and paid from the George Symonds Drain maintenance fund. These costs will be reimbursed from the project's funding as soon as funds become available.

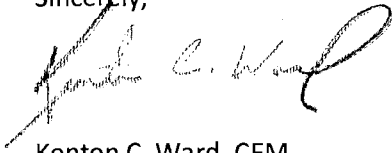

I have reviewed the benefitted drainage shed and upon considering each parcel individually, I believe each parcel within the drainage shed will have equal benefits as provided by the drain. Therefore, I recommend each tract be assessed on the same basis equally. I also believe that no

damages will result to landowners by reconstruction of this drain. I recommend a reconstruction assessment of \$23.08 per acre with a minimum assessment of \$23.08.

The final costs to be assessed shall be based on the actual construction contract amounts, professional services contract amounts, and any approved change orders.

I recommend that a hearing be held for this matter on November 22, 2021.

Sincerely,

A handwritten signature in black ink, appearing to read "Kenton C. Ward". The signature is fluid and cursive, with a large loop at the end.
